A

GIFT PACKAGING

5

- 10 Set of materials for packaging presents and the like including means for containing the objects, for closure, for forming a "bow" and for sending greetings

The invention concerns packaging for presents and the like.

- A present is usually delivered to the recipient in an attractive package
15 adorned with a "bow" of ribbon, completed with a written message and with indication of the sender and the consignee.

- To make up the package involves separate purchases of the materials such as sheets of patterned paper or ready-made bags, ribbons for decoration, or ready-made "bows", cards on which to
20 write a message for the recipient, materials for closing the package, generally consisting of a roll of transparent adhesive tape.

This is a troublesome process especially if many presents have to be packed, as happens at Christmas or at other events when many of such packages must be despatched.

- 25 If only one package has to be made up, it is a nuisance having to carry the materials home from a shop, especially as they are so easily creased.

- In the case of a number of packages, the risk of spoiling packing materials is even greater because of the quantities of different
30 components while, on arriving home, much space is needed for placing them, cutting up the packing paper and making up the packages.

- Even when a supplier of such materials provides everything needed, the materials themselves occupy as much space as a shopping bag. The invention here to be described avoids these drawbacks in addition to offering other considerable advantages as well.
- 5 Subject of the invention is a set of materials for packaging presents and the like comprising means for containing the present, for closing the container, for creating a decorative "bow", for writing a message of greetings and for indicating the names of sender and recipient. In one advantageous execution, the means for containing the present
- 10 is an envelope.
- The means of closure comprise a flap covering the full width of the front face of the envelope and a self-adhesive strip of substantially the same width as that of the flap, covering the entire width of the border of the rear face of the envelope.
- 15 The means for creating the decorative "bow" consist of a flat extended length of the material used comprising a pair of superimposed ribbons between which is a pair of flat tie-strips, these also superimposed.
- The ribbons are held together by transversal pairs of joining points on either side of the pair of tie-strips but separated by a space so that
- 20 said strips can slide freely in relation to the ribbons.
- The pairs of ribbons and tie-strips are joined together at one end. By sliding the free ends of the ribbons along the tie-strips as far as their joined ends, the ribbons will form a series of loops that spread
- 25 out side by side from said joined ends so forming a "bow"-type decoration.
- The means for writing a message consists of an area on the rear face of the envelope comprising sides prepared for partial or total detachment and at least one non-tear-off side.
- 30 The inside of that face at the position of said area presents a "patch" applied by adhesive or other means, for ensuring continuity of said

2

face even if the part to be used for the message is detached or folded back on its non-tear-off side.

The means for indicating the names of the sender and recipient consists of a label applied to an adhesive area on the rear face of the envelope, to which area the bow can be applied when left free after transferring the label to the front face of the envelope.

The outer faces of the containing means preferably present some decorative design.

In one advantageous execution the envelope is made of paper.

10 The pair of ribbons and the pair of tie-strips can also consist of a single ribbon and a single tie-strip folded in the middle.

In one type of execution the distances between the transversal pairs of joining points between the two ribbons, differ reciprocally.

In one type of execution said distances between the transversal pairs of joining points of the two ribbons decrease starting from the end where they are joined together.

15 The area for writing a message presents, on the internal face, a layer of adhesive enabling it to be removed and affixed to any other position on the envelope.

20 The invention offers evident advantages.

The set of materials, that can be purchased and carried to its point of use lying flat as initially disposed or rolled up, facilitates the operation of packaging presents in general, lessening the risk of spoiling the components if purchased separately.

25 The package is given a "professional" look which enhances the whole decorative effect, even if achieved with great simplicity.

Characteristics and purposes of the invention will be made still clearer by the following examples of its execution illustrated by diagrammatically drawn figures.

30 Fig. 1 A set of materials for packaging presents and the like, rear perspective.

Fig. 2 The decorative "bow" laid out flat, perspective.

Fig. 3 The "bow", perspective.

Fig. 4 The package, rear perspective.

Fig. 5 The package, front perspective.

The set 10 comprises a container in the form of an envelope 15 with a front face 16 and a rear face 17.

The sealing flap 20 is joined to the edge of the front face 16.

Close to the edge on the rear face 17 is a self-adhesive strip 25 that will lie under the flap 20 when it is folded down onto the rear face 17 (Fig. 4).

10 The "bow" 30 is laid flat 31 full length on said self-adhesive strip 25. Thus laid 31, shows (Figures 1-3) that it consists of a pair of ribbons 35, 36 with their respective ends 37, 38 and in between them a pair of flat tie-strips 40, 41 with their respective ends 42, 43.

15 The length of the ribbons 35, 36 and of the tie-strips 40, 41 corresponds substantially to the width of the envelope 15, the width of said ribbons corresponding to the width of the self-adhesive strip 25 so that, when laid at full length 31, the "bow" 30 practically covers said self-adhesive strip 25.

20 The two ribbons 35, 36 are joined (Fig. 2) by a series of transversal pairs of joining points, such as 50-50, 51-51, 52-52, 53-53 on either side of the pair of tie-strips so that these latter can freely slide between the ribbons.

The ends 37, 38 of the ribbons 35, 36 are given a swallow-tail cut. At one end the pair of ribbons and the pair of tie-strips are joined 25 together.

A label 70, to be used for the name of the sender 71 and of the recipient 72, is attached by adhesive near the upper edge of the rear face 17 of the envelope.

The package is very simple to make up.

30 The ribbon laid flat 31 is detached from the self-adhesive strip 25.

On pulling the tie-strips 40, 41 through the two ribbons 35, 36 as shown in Figure 2, the areas between the joining points 50-53 fold up

forming pairs of wave-like folds, 60-62, finally creating the "bow" 30 (Figure 3).

In Figure 3, the connecting point 55 between ribbons and tie-strips lies in the centre of the bow.

- 5 On detaching the flat ribbon 31, the self-adhesive strip 25 is laid bare and can be used, when the present has been put inside, to close the envelope by folding the flap 20 over the edge of the front face 16 onto said self-adhesive strip.

The label 70 on the rear face 17 of the envelope is then detached
10 and can be placed, for example, on the front face 16 (Figure 5), leaving free an adhesive area 65 on which the "bow", when ready, can be placed, as shown in Figure 4.

- An area 80 is prepared, on said front face 16, for printed or written greetings 85, said area having sides prepared for detachment and at
15 least one non-tear-off side 81, allowing it to be removed or folded back as seen in Figure 5.

The internal surface of said area 80 is adhesive 84 and can be affixed to any part of the envelope.

- The window 88 opened by removal of the label, is then closed by a
20 "patch" 90 joined to the internal surface of the envelope by an adhesive 91 or other means prepared around said window 88.

The external surfaces of the envelope present decorations.

CLAIMS

1. Set of materials for packaging presents and the like, characterized in that it comprises means for containing the presents, for closing the containing means, for creating a decorative "bow", for
5 writing greetings and for indicating the names of the sender and recipient.
2. Set of materials for packaging presents and the like as in claim 1, characterized in that the containing means substantially consists of an envelope.
- 10 3. Set of materials for packaging presents and the like as in claim 1, characterized in that the closing means comprise a flap covering the full width of the front face of the envelope and a self-adhesive strip whose width is substantially that of the flap, covering the whole width of the border of the rear face of the envelope.
- 15 4. Set of materials for packaging presents and the like as in claim 1, characterized in that the means for creating the decorative bow comprise, when the bow is laid out flat, a pair of superimposed ribbons in between which is laid a pair of flat tie-strips, also superimposed, the ribbons being joined together by transversally
20 placed pairs of joining points on each side of the pair of tie-strips at a distance from said tie-strips such as to allow them to slide freely between the ribbons, said pairs of ribbons and of tie-strips being joined together at one end, it being thus possible, by causing the free ends of the ribbons to slide in relation to the tie-strips as far as their
25 joined ends, to create in the ribbons a series of folds that spread out side by side from said reciprocally joined ends and form the "bow".
5. Set of materials for packaging presents and the like as in claim 1, characterized in that the means for writing a message consists of an area on the rear face of the envelope comprising sides prepared for
30 detachment that permit partial or total removal, and at least one non tear-off side, there being fixed, by adhesive or other means, to the internal rear face at the position of said area, a "patch" to ensure

a
X

continuity of said face even if the area for writing the message is detached or folded back onto one non-tear-off side.

6. Set of materials for packaging presents and the like as in claims 1, 2 and 4,

5 characterized in that the means for indicating the names of sender and recipient is a label applied to an adhesive area on the rear face of the envelope, permitting application of the bow on said adhesive area when left free after the label has been transferred to the front face of the envelope.

10 7. Set of materials for packaging presents and the like as in claim 1, characterized in that the external face of the containing means presents decorative designs.

8. Set of materials for packaging presents and the like as in claim 2, characterized in that the envelope is made of paper.

15 9. Set of materials for packaging presents and the like as in claim 4, characterized in that the pair of ribbons and the pair of flat tie-strips are respectively realized with a single ribbon and single tie-strip folded in the middle.

20 10. Set of materials for packaging presents and the like as in claim 4, characterized in that the distances between the transversally placed pairs of joining points of the two ribbons differ reciprocally.

25 11. Set of materials for packaging presents and the like as in claim 4, characterized in that the distances between the transversally placed pairs of joining points of the two ribbons decrease starting from the area where their ends are joined.

12. Set of materials for packaging presents and the like as in claims 2 and 5,

30 characterized in that the internal face of the area for writing a message presents a self-adhesive layer allowing it to be removed and applied to any other part of the envelope.

(54) Título: PAQUETE PARA REGALOS

(57) Resumen: Conjunto (10) de materiales para empacar regalos y semejantes que comprende medios para contener los regalos, para cerrar los medios que contienen, para decorar un "corbatín" decorativo (30), para escribir un mensaje o saludo y para indicar los nombres del remitente y el destinatario.

Publicado:

— con el informe de búsqueda internacional.

Para los códigos de dos letras y otras abreviaturas, referirse a las "Notas de Guía sobre Códigos y Abreviaturas" que aparece al comienzo de cada emisión regular de la Gaceta del PCT.

EMPAQUE PARA REGALOS

5
X0

Conjunto de materiales para empacar regalos y semejantes que incluye medios para contener objetos, para cierre, para formar un "corbatín" y para enviar saludos.

La invención concierne a paquetes para regalos y semejantes. Un regalo usualmente se envía a un destinatario en un paquete atractivo adornado con un "corbatín" de cinta, completo con un mensaje escrito e indicaciones del remitente y el destinatario.

Hacer el paquete involucra compras separadas de materiales tales como hojas de papel con patrones o bolsas prefabricadas, cintas para decoración, o "corbatines" prefabricados, tarjetas en las cuales se escribe un mensaje para el destinatario, materiales para cerrar el paquete, que generalmente consisten de un rollo de cinta adhesiva transparente.

Este es un proceso engorroso especialmente si hay que empacar muchos regalos, como sucede en navidad o en otros eventos cuando se deben despachar muchos de tales paquetes.

Si solo se debe hacer un paquete, es inconveniente tener que cargar los materiales a casa desde la tienda, especialmente ya que se arrugan tan fácilmente.

En el caso de un número de paquetes, el riesgo de dañar los materiales de empacado es aun mayor por las cantidades de diferentes componentes mientras que, al llegar a casa, se requiere mucho espacio para colocarlos, cortar el papel de empacado y hacer los empaques.

Incluso cuando un proveedor de tales materiales proporciona todo lo necesario, los materiales mismos ocupan tanto espacio como una bolsa de compras. La invención aquí descrita evita estos reveses además de ofrecer otras ventajas considerables.

El objeto de la invención es un conjunto de materiales para empacar regalos y demás que comprende medios para contener el regalo, para cerrar el recipiente, para crear un "corbatín" decorativo, para escribir un mensaje de saludo y para indicar los nombres del remitente y el destinatario.

En una modalidad ventajosa, el medio para contener el regalo es un sobre.

El medio de cierre comprende una lengüeta que cubre el ancho completo de la cara frontal del sobre y una cinta autoadhesiva de sustancialmente el mismo ancho que la lengüeta, cubriendo la totalidad del ancho del borde de la cara posterior del sobre.

El medio para crear el "corbatín" decorativo consiste utilizar una longitud extendida de material que comprende un par de cintas superpuestas entre las cuales hay un par de bandas de amarre planas, estas también están superpuestas.

Las cintas son sostenidas por pares transversales de puntos de unión a cada lado de las bandas de amarre pero separadas por un espacio tal que cada banda puede deslizarse libremente en relación con las cintas.

Los pares de cintas y de bandas de amarre se unen en un extremo.

Al deslizar los extremos libres de las cintas a lo largo de las bandas de amarre tanto como sus extremos juntos, las cintas formarán una serie de horquillas que se abren lado a lado desde dichos extremos unidos formando así una decoración tipo corbatín.

El medio para escribir un mensaje consiste de un área en la cara posterior del sobre que comprende lados preparados para desprenderse total o parcialmente y al menos un lado que no se desprende.

El interior de esa cara en la posición de dicha área presenta un "parche" aplicado por adhesivo u otros medios, para asegurar la continuidad de dicha cara aun si la parte a utilizarse con el mensaje es desprendida o plegada sobre su lado que no se desprende.

El medio para indicar los nombres del remitente y el destinatario consiste de una marquilla aplicada a un área adhesiva en la cara posterior del sobre, a la cual se puede aplicar el corbatín cuando queda libre después de transferir la marquilla a la cara frontal del sobre.

Las caras exteriores de los medios de contención preferiblemente presentan algún diseño decorativo.

En una modalidad ventajosa el sobre está hecho de papel.

El par de cintas y el par de bandas de amarre también pueden consistir de una sola cinta y una sola banda de amarre dobladas en la mitad.

En un tipo de modalidad las distancias entre los pares transversales de las puntas de unión entre las dos cintas, difieren recíprocamente.

En un tipo de modalidad dichas distancias entre los pares transversales de los puntos de unión de las dos cintas disminuyen comenzando en los extremos donde están unidas.

El área para escribir mensajes presenta, en la cara interior, una capa de adhesivo que permite removerla y fijarla en cualquier otra posición sobre el sobre.

La invención ofrece ventajas evidentes.

El conjunto de materiales, que puede comprarse y llevarse a su punto de uso de manera plana como se dispone inicialmente o enrollada, facilita la operación del

R 17

empacado de regalos en general, disminuyendo el riesgo de dañar los componentes si se compran por separado.

El paquete tiene un aspecto "profesional" lo cual mejora todo el efecto decorativo, aun si se logra con gran simplicidad.

Las características y los propósitos de la invención se harán aun más claras por los siguientes ejemplos de sus modalidades ilustrados por las figuras diagramáticas.

La figura 1 es un conjunto de materiales para empacar regalos y demás, perspectiva posterior.

La figura 2 es el "corbatín" decorativo plano, perspectiva.

La figura 3 es el "corbatín", perspectiva.

La figura 4 es el empaque, perspectiva posterior.

La figura 5 es el empaque, perspectiva frontal.

El conjunto 10 comprende un recipiente en la forma de un sobre 15 con una cara frontal 16 y una cara posterior 17.

La lengüeta de sello 20 está unida al borde de la cara frontal 16.

Cerca al borde en la cara posterior 17 hay una banda autoadhesiva 25 que estará bajo la lengüeta 20 cuando esté doblada sobre la cara posterior 17 (Fig. 4).

El "corbatín" 30 está aplanado 31 en toda su longitud sobre dicha banda autoadhesiva 25. Puesto de esa forma 31, muestra (Figuras 1 - 3) que consiste de un par de cintas 35, 36 con sus extremos respectivos 37, 38 y entre ellos un par de bandas de amarre planas 40, 41 con sus respectivos extremos 42, 43.

La longitud de las cintas 35, 36 y de las bandas de amarre 40, 41 corresponde sustancialmente al ancho del sobre 15, el ancho de dichas cintas corresponde al ancho de la banda autoadhesiva 25 tal que cuando se ponen en todas su longitud 31, el "corbatín" 30 prácticamente cubre dicha banda autoadhesiva 25.

Las dos cintas 35, 36 están unidas (Fig. 2) por una serie de pares transversales de puntos de unión, tal como 50-50, 51-51, 52-52, 53-53 a cada lado de dicho par de bandas de amarre tal que estas últimas pueden deslizarse libremente entre las cintas.

A los extremos 37, 38 de las cintas 35, 36 se les da un corte de cola de golondrina.

En un extremo del par de cintas y del par de bandas de amarre estas están unidas 55.

Una marquilla 70, para ser utilizada con el nombre del remitente 71 y del destinatario 72, está unida por adhesivo cerca del borde superior de la cara posterior 17 del sobre.

10
7

El paquete es muy fácil de amar.

La cinta plana 31 es despegada de la banda autoadhesiva 25.

Al halar de las bandas de amarre 40, 41 por las dos cintas 35, 36 como se muestra en la figura 2, las áreas entre los puntos de unión 50 -53 se pliegan formando pares de pliegue tipo onda, 60 - 62, creando finalmente un "corbatín" 30 (figura 3).

En la figura 3, el punto de conexión 55 entre las cintas y las bandas de amarre yace en el centro del corbatín.

Al despegar la cinta plana 31, la banda autoadhesiva 25 queda descubierta y puede utilizarse, cuando se ha puesto el regalo en el interior, para cerrar el sobre doblando la lengüeta 20 sobre el borde de la cara frontal 16 sobre dicha banda autoadhesiva.

Luego se desprende la marquilla 70 en la cara posterior 17 del sobre y se puede colocar, por ejemplo, en la cara frontal 16 (Figura 5), dejando libre un área adhesiva 65 sobre la cual puede colocarse el "corbatín", cuando esté listo, como lo muestra la figura 4.

Se prepara un área 80, en dicha cara frontal 16, para saludos impresos o escritos, dicha área tiene lados preparados para desprendimiento y al menos un lado que no se desprende 81, lo que permite que sea removida o doblada como se ve en la figura 5.

La superficie interna de dicha área 80 es adhesiva 84 y puede fijarse a cualquier parte del sobre.

La ventana 88 abierta por remoción de la marquilla, se cierra luego con un "parche" 90 unido a la superficie interna del sobre por un adhesivo 91 u otros medios preparados alrededor de dicha ventana 88.

19
B

REIVINDICACIONES

1. Conjunto de materiales para empacar regalos y semejantes, caracterizado por que comprende medios para contener los regalos, para cerrar los medios que contienen, para crear un "corbatín" decorativo, para escribir saludos y para indicar los nombres del remitente y el destinatario.
2. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 1, caracterizado por que los medios que contienen consisten sustancialmente de un sobre.
3. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 1, caracterizado por que los medios de cierre comprenden una lengüeta que cubre el ancho completo de la cara frontal del sobre y una cinta autoadhesiva cuyo ancho es sustancialmente el de la lengüeta, cubriendo la totalidad del ancho del borde de la cara posterior del sobre.
4. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 1, caracterizado por que los medios para crear el corbatín decorativo comprenden, cuando el corbatín está plano, un par de cintas superpuestas entre las cuales yace un par de bandas planas de amarre, también superpuestas, las cintas están unidas por pares de puntos de unión colocados transversalmente a una distancia de dichas bandas de amarre tal que permite que se deslicen libremente entre las cintas, dicho par de cintas y de bandas de amarre están unidas en un extremo, lo cual es posible, haciendo que los extremos libres de las cintas se deslicen en relación con las bandas de amarre tan lejos como sus extremos unidos, para crear en las cintas una serie de pliegues que se esparcen lado a lado desde dichos extremos recíprocos de unión y formar el "corbatín".
5. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 1, caracterizados por que los medios para escribir el mensaje consisten de un área en la cara posterior del sobre que comprende lados preparados para ser desprendidos que permiten una remoción parcial o total, y al menos un lado que no se desprende, el cual está fijado, por adhesivo u otros medios, a la cara posterior interna en la posición de dicha área, un "parche" para asegurar la continuidad de dicha cara aun si el área para escribir el mensaje es desprendida o doblada sobre un de los lados de no desprender.
6. Conjunto de materiales para empacar regalos y semejantes como en las reivindicaciones 1, 2 y 4, caracterizados por que los medios para indicar los nombres del remitente y el destinatario son una marquilla aplicada a un área adhesiva en la cara posterior del sobre, lo que permite la aplicación del corbatín

20
✓

sobre dicha área adhesiva cuando queda libre después que se ha transferido la marquilla a la cara frontal del sobre.

7. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 1, caracterizado por que la cara externa de los medios que contienen presenta signos decorativos.
8. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 2, caracterizado porque el sobre está hecho de papel.
9. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 4, caracterizado porque el par de cintas y el par de bandas planas de amarre están configuradas respectivamente con una sola cinta y una sola banda de amarre dobladas en el medio.
10. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 4, caracterizado porque las distancias entre los pares de puntos de unión de las dos cintas dispuestos transversalmente difieren recíprocamente.
11. Conjunto de materiales para empacar regalos y semejantes como en la reivindicación 4, caracterizado porque las distancias entre los pares de puntos de unión de las dos cintas dispuestos transversalmente disminuyen a partir del área donde se unen los extremos.
12. Conjunto de materiales para empacar regalos y semejantes como en las reivindicaciones 2 y 5, caracterizado porque la cara interna del área para escribir un mensaje presenta una capa autoadhesiva que permite que sea removida y aplicada a cualquier otra parte del sobre.

IMPORTANT NOTIFICATION

International application No.

PCT/IT03/00364

International filing date (day/month/year)

11/06/2003

Priority date (day/month/year)

09/08/2002

Applicant

SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A. et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.

2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.

3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/LB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Applicant SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A. et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 2 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consists of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No.

PCT/IT03/00364

I. Basis of the report

The basis of this international preliminary examination is the application as originally filed.

V. Reasoned statement under Rule 66.2(a)(II) with regard to novelty, inventive step or industrial applicability

In light of the documents cited in the international search report, it is considered that the invention as defined in at least some of the claims does not appear to meet the criteria mentioned in Article 33(1) PCT, i.e. does not appear to be novel and/or to involve an inventive step (see international search report, in particular the documents cited X and/or Y and corresponding claim references).

Applicant's or agent's file reference ./.		REPLY DUE within 2 / 00 months/days from the above date of mailing
International application No. PCT/IT03/00364	International filing date (day/month/year) 11/06/2003	Priority date (day/month/year) 09/08/2002
International Patent Classification (IPC) or both national classification and IPC B65D27/00		
Applicant SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A. et al.		

- This written opinion is the first drawn up by this International Preliminary Examining Authority.
- This opinion contains indications relating to the following items:
 - ☒ Basis of the opinion
 - ☐ Priority
 - ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
 - ☐ Lack of unity of invention
 - ☒ Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
 - ☐ Certain documents cited
 - ☐ Certain defects in the international application
 - ☐ Certain observations on the international application
- The applicant is hereby invited to reply to this opinion.

When? See the time limit indicated above. The applicant may, before the expiration of that time limit, request this Authority to grant an extension, see Rule 66.2(d).

How? By submitting a written reply, accompanied, where appropriate, by amendments, according to Rule 66.3. For the form and the language of the amendments, see Rules 66.8 and 66.9.

Also For an additional opportunity to submit amendments, see Rule 66.4. For the examiner's obligation to consider amendments and/or arguments, see Rule 66.4bis. For an informal communication with the examiner, see Rule 66.5.

If no reply is filed, the international preliminary examination report will be established on the basis of this opinion.
- The final date by which the international preliminary examination report must be established according to Rule 69.2 is: 09/12/2004

25

I. Basis of the opinion

1. The basis of this written opinion is the application as originally filed.

2

V. Reasoned statement under Rule 66.2(a)(II) with regard to novelty, inventive step or industrial applicability

1. In light of the documents cited in the international search report, it is considered that the invention as defined in at least some of the claims does not appear to meet the criteria mentioned in Article 33(1) PCT, i.e. does not appear to be novel and/or to involve an inventive step (see international search report, in particular the documents cited X and/or Y and corresponding claims references).
2. If amendments are filed, the applicant should comply with the requirements of Rule 66.8 PCT and indicate the basis of the amendments in the documents of the application as originally filed (Article 34 (2) (b) PCT) otherwise these amendments may not be taken into consideration for the establishment of the international preliminary examination report. The attention of the applicant is drawn to the fact that if the application contains an unnecessary plurality of independent claims, no examination of any of the claims will be carried out.

NB: Should the applicant decide to request detailed substantive examination, then an international preliminary examination report will normally be established directly. Exceptionally the examiner may draw up a second written opinion, should this be explicitly requested.

| ☐ | ☐ | ☐ |

Precautionary Designation Statement: In addition to the designations made above, the applicant also makes under Rule 4.9(b) all other designations which would be permitted under the PCT except any designation(s) indicated in the Supplemental Box as being excluded from the scope of this statement. The applicant declares that those additional designations are subject to confirmation and that any designation which is not confirmed before the expiration of 15 months from the priority date is to be regarded as withdrawn by the applicant at the expiration of that time limit. (Confirmation (including fees) must reach the receiving Office within the 15-month time limit.)

29
22**Box No. VI PRIORITY CLAIM**

The priority of the following earlier application(s) is hereby claimed:

Filing date of earlier application (day/month/year)	Number of earlier application	Where earlier application is:		
		national application: country or Member of WTO	regional application:* regional Office	international application: receiving Office
item (1) AUGUST 08,2002 09/08/2002	1807-2002	CILE		
item (2) MAY 29,2003 29/05/2003	MI2003A001076	ITALY		
item (3)				
item (4)				
item (5)				

☐ Further priority claims are indicated in the Supplemental Box.

The receiving Office is requested to prepare and transmit to the International Bureau a certified copy of the earlier application(s) (only if the earlier application was filed with the Office which for the purposes of this international application is the receiving Office) identified above as:

☐ all items ☐ item (1) ☐ item (2) ☐ item (3) ☐ item (4) ☐ item (5) ☐ other, see Supplemental Box

* Where the earlier application is an ARIPO application, indicate at least one country party to the Paris Convention for the Protection of Industrial Property or one Member of the World Trade Organization for which that earlier application was filed (Rule 4.10(b)(II)):

Box No. VII INTERNATIONAL SEARCHING AUTHORITY

Choice of International Searching Authority (ISA) (if two or more International Searching Authorities are competent to carry out the international search, indicate the Authority chosen; the two-letter code may be used):

- 10 **Set of materials for packaging presents and the like including means for containing the objects, for closure, for forming a "bow" and for sending greetings**

The invention concerns packaging for presents and the like.

- A present is usually delivered to the recipient in an attractive package
15 adorned with a "bow" of ribbon, completed with a written message and with indication of the sender and the consignee.

- To make up the package involves separate purchases of the materials such as sheets of patterned paper or ready-made bags, ribbons for decoration, or ready-made "bows", cards on which to
20 write a message for the recipient, materials for closing the package, generally consisting of a roll of transparent adhesive tape.

- This is a troublesome process especially if many presents have to be packed, as happens at Christmas or at other events when many of such packages must be despatched.

- 25 If only one package has to be made up, it is a nuisance having to carry the materials home from a shop, especially as they are so easily creased.

- In the case of a number of packages, the risk of spoiling packing materials is even greater because of the quantities of different
30 components while, on arriving home, much space is needed for placing them, cutting up the packing paper and making up the packages.

134

Even when a supplier of such materials provides everything needed, the materials themselves occupy as much space as a shopping bag.

The invention here to be described avoids these drawbacks in addition to offering other considerable advantages as well.

5 Subject of the invention is a set of materials for packaging presents and the like comprising means for containing the present, for closing the container, for creating a decorative "bow", for writing a message of greetings and for indicating the names of sender and recipient.

10 In one advantageous execution, the means for containing the present is an envelope.

The means of closure comprise a flap covering the full width of the front face of the envelope and a self-adhesive strip of substantially the same width as that of the flap, covering the entire width of the border of the rear face of the envelope.

15 The means for creating the decorative "bow" consist of a flat extended length of the material used comprising a pair of superimposed ribbons between which is a pair of flat tie-strips, these also superimposed.

20 The ribbons are held together by transversal pairs of joining points on either side of the pair of tie-strips but separated by a space so that said strips can slide freely in relation to the ribbons.

The pairs of ribbons and tie-strips are joined together at one end.

25 By sliding the free ends of the ribbons along the tie-strips as far as their joined ends, the ribbons will form a series of loops that spread out side by side from said joined ends so forming a "bow"-type decoration.

The means for writing a message consists of an area on the rear face of the envelope comprising sides prepared for partial or total detachment and at least one non-tear-off side.

30 The inside of that face at the position of said area presents a "patch" applied by adhesive or other means, for ensuring continuity of said

face even if the part to be used for the message is detached or folded back on its non-tear-off side.

The means for indicating the names of the sender and recipient consists of a label applied to an adhesive area on the rear face of the envelope, to which area the bow can be applied when left free after

5 transferring the label to the front face of the envelope.

The outer faces of the containing means preferably present some decorative design.

In one advantageous execution the envelope is made of paper.

10 The pair of ribbons and the pair of tie-strips can also consist of a single ribbon and a single tie-strip folded in the middle.

In one type of execution the distances between the transversal pairs of joining points between the two ribbons, differ reciprocally.

In one type of execution said distances between the transversal pairs

15 of joining points of the two ribbons decrease starting from the end where they are joined together.

The area for writing a message presents, on the internal face, a layer of adhesive enabling it to be removed and affixed to any other position on the envelope.

20 The invention offers evident advantages.

The set of materials, that can be purchased and carried to its point of use lying flat as initially disposed or rolled up, facilitates the operation of packaging presents in general, lessening the risk of spoiling the components if purchased separately.

25 The package is given a "professional" look which enhances the whole decorative effect, even if achieved with great simplicity.

Characteristics and purposes of the invention will be made still clearer by the following examples of its execution illustrated by diagrammatically drawn figures.

30 Fig. 1 A set of materials for packaging presents and the like, rear perspective.

Fig. 2 The decorative "bow" laid out flat, perspective.

36
H

Fig. 3 The "bow", perspective.

Fig. 4 The package, rear perspective.

Fig. 5 The package, front perspective.

The set 10 comprises a container in the form of an envelope 15 with
5 a front face 16 and a rear face 17.

The sealing flap 20 is joined to the edge of the front face 16.

Close to the edge on the rear face 17 is a self-adhesive strip 25 that
will lie under the flap 20 when it is folded down onto the rear face 17
(Fig. 4).

10 The "bow" 30 is laid flat 31 full length on said self-adhesive strip 25.
Thus laid 31, shows (Figures 1-3) that it consists of a pair of ribbons
35, 36 with their respective ends 37, 38 and in between them a pair
of flat tie-strips 40, 41 with their respective ends 42, 43.

The length of the ribbons 35, 36 and of the tie-strips 40, 41 corres-
15 ponds substantially to the width of the envelope 15, the width of said
ribbons corresponding to the width of the self-adhesive strip 25 so
that, when laid at full length 31, the "bow" 30 practically covers said
self-adhesive strip 25.

The two ribbons 35, 36 are joined (Fig. 2) by a series of transversal
20 pairs of joining points, such as 50-50, 51-51, 52-52, 53-53 on either
side of the pair of tie-strips so that these latter can freely slide
between the ribbons.

The ends 37, 38 of the ribbons 35, 36 are given a swallow-tail cut.

At one end the pair of ribbons and the pair of tie-strips are joined 55
25 together.

A label 70, to be used for the name of the sender 71 and of the
recipient 72, is attached by adhesive near the upper edge of the rear
face 17 of the envelope.

The package is very simple to make up.

30 The ribbon laid flat 31 is detached from the self-adhesive strip 25.

On pulling the tie-strips 40, 41 through the two ribbons 35, 36 as
shown in Figure 2, the areas between the joining points 50-53 fold up

forming pairs of wave-like folds, 60-62, finally creating the "bow" 30 (Figure 3).

In Figure 3, the connecting point 55 between ribbons and tie-strips lies in the centre of the bow.

- 5 On detaching the flat ribbon 31, the self-adhesive strip 25 is laid bare and can be used, when the present has been put inside, to close the envelope by folding the flap 20 over the edge of the front face 16 onto said self-adhesive strip.

- 10 The label 70 on the rear face 17 of the envelope is then detached and can be placed, for example, on the front face 16 (Figure 5), leaving free an adhesive area 65 on which the "bow", when ready, can be placed, as shown in Figure 4.

- 15 An area 80 is prepared, on said front face 16, for printed or written greetings 85, said area having sides prepared for detachment and at least one non-tear-off side 81, allowing it to be removed or folded back as seen in Figure 5.

The internal surface of said area 80 is adhesive 84 and can be affixed to any part of the envelope.

- 20 The window 88 opened by removal of the label, is then closed by a "patch" 90 joined to the internal surface of the envelope by an adhesive 91 or other means prepared around said window 88.

The external surfaces of the envelope present decorations.

CLAIMS

1. Set of materials for packaging presents and the like, characterized in that it comprises means for containing the presents, for closing the containing means, for creating a decorative "bow", for
5 writing greetings and for indicating the names of the sender and recipient.
2. Set of materials for packaging presents and the like as in claim 1, characterized in that the containing means substantially consists of an envelope.
- 10 3. Set of materials for packaging presents and the like as in claim 1, characterized in that the closing means comprise a flap covering the full width of the front face of the envelope and a self-adhesive strip whose width is substantially that of the flap, covering the whole width of the border of the rear face of the envelope.
- 15 4. Set of materials for packaging presents and the like as in claim 1, characterized in that the means for creating the decorative bow comprise, when the bow is laid out flat, a pair of superimposed ribbons in between which is laid a pair of flat tie-strips, also superimposed, the ribbons being joined together by transversally
20 placed pairs of joining points on each side of the pair of tie-strips at a distance from said tie-strips such as to allow them to slide freely between the ribbons, said pairs of ribbons and of tie-strips being joined together at one end, it being thus possible, by causing the free ends of the ribbons to slide in relation to the tie-strips as far as their
25 joined ends, to create in the ribbons a series of folds that spread out side by side from said reciprocally joined ends and form the "bow".
5. Set of materials for packaging presents and the like as in claim 1, characterized in that the means for writing a message consists of an area on the rear face of the envelope comprising sides prepared for
30 detachment that permit partial or total removal, and at least one non tear-off side, there being fixed, by adhesive or other means, to the internal rear face at the position of said area, a "patch" to ensure

3a
D

continuity of said face even if the area for writing the message is detached or folded back onto one non-tear-off side.

6. Set of materials for packaging presents and the like as in claims 1, 2 and 4,

5 characterized in that the means for indicating the names of sender and recipient is a label applied to an adhesive area on the rear face of the envelope, permitting application of the bow on said adhesive area when left free after the label has been transferred to the front face of the envelope.

10 7. Set of materials for packaging presents and the like as in claim 1, characterized in that the external face of the containing means presents decorative designs.

8. Set of materials for packaging presents and the like as in claim 2, characterized in that the envelope is made of paper.

15 9. Set of materials for packaging presents and the like as in claim 4, characterized in that the pair of ribbons and the pair of flat tie-strips are respectively realized with a single ribbon and single tie-strip folded in the middle.

20 10. Set of materials for packaging presents and the like as in claim 4, characterized in that the distances between the transversally placed pairs of joining points of the two ribbons differ reciprocally.

25 11. Set of materials for packaging presents and the like as in claim 4, characterized in that the distances between the transversally placed pairs of joining points of the two ribbons decrease starting from the area where their ends are joined.

12. Set of materials for packaging presents and the like as in claims 2 and 5,

30 characterized in that the internal face of the area for writing a message presents a self-adhesive layer allowing it to be removed and applied to any other part of the envelope.

90
X**ABSTRACT**

Set of materials for packaging presents and the like comprising means for containing the presents, for closing the containing means, for creating a decorative "bow", for writing a message of greetings and for indicating the names of sender and recipient.

Filing of amendments and statement under Article 18:

The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):

When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet.

Where? Directly to the International Bureau of WIPO
34, chemin des Colombettes
1211 Geneva 20, Switzerland
Facsimile No.: (41-22) 740.14.35

For more detailed instructions, see the notes on the accompanying sheet.

2. ☐ The applicant is hereby notified that no International Search Report will be established and that the declaration under Article 17(2)(a) to that effect is transmitted herewith.

3. ☐ With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:

☐ the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.

☐ no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

4. Further action(s): The applicant is reminded of the following:

Shortly after 18 months from the priority date, the International application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the International application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for International publication.

Within 18 months from the priority date, a demand for International preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later).

Within 20 months from the priority date, the applicant must perform the prescribed acts for entry into the national phase before all designated Offices which have not been elected in the demand or in a later election within 18 months from the priority date or could not be elected because they are not bound by Chapter II.

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the letter to be published for the purpose of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

2575

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

1. [Where originally there were 48 claims and after amendment of some claims there are 51]:
"Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
2. [Where originally there were 15 claims and after amendment of all claims there are 11]:
"Claims 1 to 15 replaced by amended claims 1 to 11."
3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
"Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added," or
"Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
4. [Where various kinds of amendments are made]:
"Claims 1-10 unchanged; claims 11 to 13, 16 and 18 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international application is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

PATENT COOPERATION TREATY

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No.	International filing date (day/month/year)	(Earliest) Priority Date (day/month/year)
PCT/IT 03/00364	11/06/2003	09/08/2002
Applicant		
SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 5 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the language, the International search was carried out on the basis of the International application in the language in which it was filed, unless otherwise indicated under this item.

the International search was carried out on the basis of a translation of the International application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any nucleotide and/or amino acid sequence disclosed in the International application, the International search was carried out on the basis of the sequence listing:

contained in the International application in written form.

filed together with the International application in computer readable form.

furnished subsequently to this Authority in written form.

furnished subsequently to this Authority in computer readable form.

the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the International application as filed has been furnished.

the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ Certain claims were found unsearchable (See Box I).

3. ☐ Unity of invention is lacking (see Box II).

4. With regard to the title,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

GIFT PACKAGING

5. With regard to the abstract,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this International search report, submit comments to this Authority.

6. The figure of the drawings to be published with the abstract is Figure No.

as suggested by the applicant.

because the applicant failed to suggest a figure.

because this figure better characterizes the invention.

4

None of the figures.

Date of mailing (day/month/year) 29 July 2003 (29.07.03)	IMPORTANT NOTIFICATION
Applicant's or agent's file reference	International application No. PCT/IT03/00364

ATTENTION

The applicant should carefully check the data appearing in this Notification. In case of any discrepancy between these data and the indications in the International application, the applicant should immediately inform the International Bureau.

In addition, the applicant's attention is drawn to the information contained in the Annex, relating to:

- ☒ time limits for entry into the national phase - see updated important information (as of April 2002)
- ☒ confirmation of precautionary designations (if applicable)
- ☐ requirements regarding priority documents (if applicable)

A copy of this Notification is being sent to the receiving Office and to the International Searching Authority.

INFORMATION ON TIME LIMITS FOR ENTERING THE NATIONAL PHASE

The applicant is reminded that the "national phase" must be entered before each of the designated Offices indicated on the cover sheet of this Notification by paying national fees and furnishing translations, as prescribed by Articles 22 and 39 and the applicable national laws. In addition, the applicant may also have to comply with other special requirements applicable in certain Offices. It is the applicant's responsibility to ensure the necessary steps to enter the national phase are taken in a timely fashion. Most Offices do not issue reminders to applicants in connection with the entry into the national phase.

The applicable time limit for entering the national phase will, subject to what is said in the following paragraph, be 30 MONTHS from the priority date, not only in respect of any elected Office where a demand for international preliminary examination is filed before the expiration of 18 months from the priority date (see Article 39(1)), but also in respect of any designated Office, in the absence of filing of such demand, where Article 22(1) as modified with effect from 1 April 2002 applies in respect of that designated Office. For further details, see PCT Gazette No. 44/2001 of 1 November 2001, pages 19926, 19932 and 19934, as well as the PCT Newsletter, October and November 2001 and February 2002 issues.

In practice, time limits other than the 30-month time limit will continue to apply, for various periods of time, in respect of certain designated or elected Offices. For regular updates on the applicable time limits (20, 21, 30 or 31 months, or other time limit), Office by Office, refer to the PCT Gazette ("Section IV" part published on a weekly basis), to the PCT Newsletter (on a monthly basis) and to the relevant National Chapters in Volume II of the PCT Applicant's Guide (the paper version of which is updated usually twice a year and the Internet version of which is updated usually on a weekly basis). Finally, a cumulative table of all applicable time limits for entering the national phase is available from WIPO's Internet site, via links from various pages the site including those of the Gazette, Newsletter and Guide, at <http://www.wipo.int/pct/en/index.html>.

Information about the requirements for filing a demand for international preliminary examination is set out in the PCT Applicant's Guide, Volume I/A, Chapter IX. Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination (at present, all PCT Contracting States are bound by Chapter II).

CONFIRMATION OF PRECAUTIONARY DESIGNATIONS

This notification lists only specific designations made under Rule 4.9(a) in the request. It is important to check that these designations are correct. Errors in designations can be corrected where precautionary designations have been made under Rule 4.9(b). The applicant is hereby reminded that any precautionary designations may be confirmed according to Rule 4.9(c) before the expiration of 15 months from the priority date (this time limit may not be extended). If it is not confirmed, it will automatically be regarded as withdrawn by the applicant. There will be no reminder and no invitation. Confirmation of a designation consists of the filing of a notice specifying the designated State concerned (with indication of the kind of protection or treatment desired) and the payment of the designation and confirmation fees. The Notice of confirmation and payment must reach the receiving Office within the 15-month time limit.

REQUIREMENTS REGARDING PRIORITY DOCUMENTS

For applicants who have not yet complied with the requirements regarding priority documents, the following is recalled.

Where the priority of an earlier national, regional or international application is claimed, the applicant must submit a copy of the said earlier application, certified by the authority with which it was filed ("the priority document") to the receiving Office (which will transmit it to the International Bureau) or directly to the International Bureau, before the expiration of 18 months from the priority date, provided that any such priority document may still be submitted to the International Bureau before that date of international publication of the international application, in which case that document will be considered to have been received by the International Bureau on the last day of the 18-month time limit (Rule 17.1(a)).

Where the priority document is issued by the receiving Office, the applicant may, instead of submitting the priority document, request the receiving Office to prepare and transmit the priority document to the International Bureau. Such request must be made before the expiration of the 18-month time limit and may be subjected by the receiving Office to the payment of a fee (Rule 17.1(b)).

If the priority document concerned is not submitted to the International Bureau or if the request to the receiving Office to prepare and transmit the priority document has not been made (and the corresponding fee, if any, paid) within the applicable time limit indicated under the preceding paragraphs, any designated State may disregard the priority claim, provided that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within the time limit which is reasonable under the circumstances.

Where several priorities are claimed, the priority date to be considered for the purposes of computing the 18-month time limit is the filing date of the earliest application whose priority is claimed.

1. The applicant is hereby notified of the date of receipt (except where the letters "NR" appear in the right-hand column) by the International Bureau of the priority document(s) relating to the earlier application(s) indicated below. Unless otherwise indicated by an asterisk appearing next to a date of receipt, or by the letters "NR", in the right-hand column, the priority document concerned was submitted or transmitted to the International Bureau in compliance with Rule 17.1(a) or (b).
2. This updates and replaces any previously issued notification concerning submission or transmittal of priority documents.
3. An asterisk(*) appearing next to a date of receipt, in the right-hand column, denotes a priority document submitted or transmitted to the International Bureau but not in compliance with Rule 17.1(a) or (b). In such a case, the attention of the applicant is directed to Rule 17.1(a) which provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.
4. The letters "NR" appearing in the right-hand column denote a priority document which was not received by the International Bureau or which the applicant did not request the receiving Office to prepare and transmit to the International Bureau, as provided by Rule 17.1(a) or (b), respectively. In such a case, the attention of the applicant is directed to Rule 17.1(a) which provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.

Applicant

SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A. et al

1. Notice is hereby given that the International Bureau has communicated, as provided in Article 20, the international application to the following designated Offices on the date indicated above as the date of mailing of this notice:

AU, AZ, BY, CH, CN, CO, DZ, EP, HU, JP, KG, KP, KR, MD, MK, MZ, RU, TM, US

In accordance with Rule 47.1(c), third sentence, those Offices will accept the present notice as conclusive evidence that the communication of the international application has duly taken place on the date of mailing indicated above and no copy of the international application is required to be furnished by the applicant to the designated Office(s).

2. The following designated Offices have waived the requirement for such a communication at this time:

AE, AG, AL, AM, AP, AT, BA, BB, BG, BR, BZ, CA, CR, CU, CZ, DE, DK, DM, EA, EC, EE, ES, FI, GB, GD, GE, GH, GM, HR, ID, IL, IN, IS, KE, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MG, MN, MW, MX, NO, NZ, OA, OM, PH, PL, PT, RO, SC, SD, SE, SG, SK, SL, TJ, TN, TR, TT, TZ, UA, UG, UZ, VC, VN, YU, ZA, ZM, ZW

The communication will be made to those Offices only upon their request. Furthermore, those Offices do not require the applicant to furnish a copy of the international application (Rule 49.1(a-bis)).

3. Enclosed with this notice is a copy of the international application as published by the International Bureau on 19 February 2004 (19.02.2004) under No. WO 2004/014749

4. **TIME LIMITS** for filing a demand for international preliminary examination and for entry into the national phase

The applicable time limit for entering the national phase will, subject to what is said in the following paragraph, be 30 MONTHS from the priority date, not only in respect of any elected Office if a demand for international preliminary examination is filed before the expiration of 19 months from the priority date, but also in respect of any designated Office, in the absence of filing of such demand, where Article 22(1) as modified with effect from 1 April 2002 applies in respect of that designated Office. For further details, see *PCT Gazette* No. 44/2001 of 1 November 2001, pages 19926, 19932 and 19934, as well as the *PCT Newsletter*, October and November 2001 and February 2002 issues.

In practice, time limits other than the 30-month time limit will continue to apply, for various periods of time, in respect of certain designated or elected Offices. For regular updates on the applicable time limits (20, 21, 30 or 31 months, or other time limit), Office by Office, refer to the *PCT Gazette*, the *PCT Newsletter* and the *PCT Applicant's Guide*, Volume II, National Chapters, all available from WIPO's Internet site, at <http://www.wipo.int/pct/en/index.html>.

For filing a demand for international preliminary examination, see the *PCT Applicant's Guide*, Volume I/A, Chapter IX. Only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination (at present, all PCT Contracting States are bound by Chapter II).

It is the applicant's sole responsibility to monitor all these time limits.

	-/-	

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubt on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"Z" document member of the same patent family

SERPLAS INDUSTRIA DI PLASTICO SERPLAS S.A.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 5 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

2. ☐ Certain claims were found unsearchable (See Box I).

3. ☐ Unity of invention is lacking (see Box II).

4. With regard to the title,

☐ the text is approved as submitted by the applicant.

☒ the text has been established by this Authority to read as follows:

GIFT PACKAGING

5. With regard to the abstract,

☐ the text is approved as submitted by the applicant.

☒ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the drawings to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

4
☐ None of the figures.

Como resultado del examen de forma, realizado con fundamento en el artículo 38 de la Decisión 486 de la Comisión de la Comunidad Andina, artículo 27 del Tratado de Cooperación en Materia de Patentes (PCT), regla 51 bis del Reglamento y Circular Única de la Superintendencia de Industria y Comercio, se le comunica que:

- La solicitud no contiene la copia del documento en que consta la cesión del derecho a la patente del inventor al solicitante o a su causante. (Art. 26-k) Decisión 486).

En cumplimiento de lo dispuesto por el artículo 39 de la Decisión 486, se le requiere para que dentro del término de dos meses siguientes a la fecha de notificación del presente oficio, complete los requisitos anteriormente enunciados. En caso de no dar cumplimiento al presente requerimiento, la solicitud se considerará abandonada y perderá su prelación.

Notifíquese el presente oficio conforme a lo dispuesto en el numeral 5.2, literal e), del capítulo quinto del título primero de la Circular Única N° 10 de 2001.
