(54) Title: SHEET MATERIAL DISPENSER

(57) Abstract: A sheet material dispenser including a flexible pouch and a rigid container. The flexible pouch configured to receive a plurality of sheets and includes a dispenser opening. The flexible pouch includes a resealable cap for intermittently exposing and resealing the dispenser opening. The rigid container includes first and second front plates configured to be slideably coupled to the sidewalls of the rigid container such that the front plates are movable relative to one another and relative to the sidewalls between an open position, wherein the front plates are positioned in a distal relationship relative to one another, and a closed position, wherein the front plates are positioned in an adjacent relationship relative to one another. When the first and second front plates are moved to the closed position, a portion of the front plates are configured to be positioned directly below a portion of the resealable cap.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
