BARBEQUE GRILL

**Abstract:**

Source: US6883514B A  
 barbeque grill includes a base member having a bottom surface and a plurality of sidewalls integral therewith. The base member includes a plurality of spaced support rails slidably engageable with the bottom surface. A plurality of elongated support legs are connected to the plurality of support rails respectively. A pair of opposed side panels having top and bottom edge portions are secured to the plurality of support legs. The grill further includes a top member pivotally connected to one of the side panels. The top member includes a grill surface for supporting ...

ROASTER OVEN

**Abstract:**

Source: US2005155496A A roaster oven has its oven body pivotally provided with two side plates and two covering plates around four sides. The side plates and the covering plates are respectively connected by position members. A plurality of spits are fitted across the two side plates for pricking food thereon, respectively having one end assembled with a motor. The oven body is bored with an elongate hole in its front lower portion for letting through a net base on which charcoal is placed, with a handle provided on the outer side of the net base. Thus, when the motor is started, the spit ...

ELEMENT DESTINE A ETRE MONTE SUR LE CORPS D'UN BARBECUE POUR FORMER UN MODULE DE CUISSON VERTICAL, ET BARBECUE COMPORTANT UN TEL ELEMENT

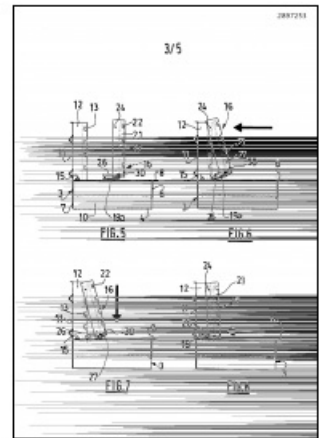

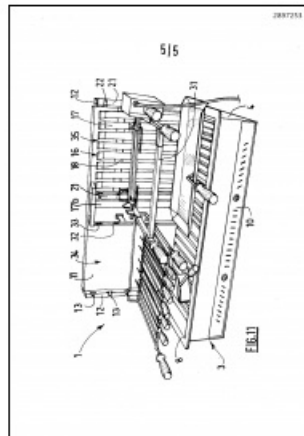

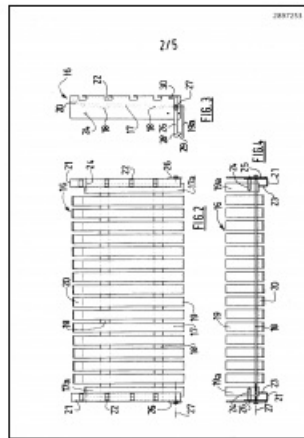

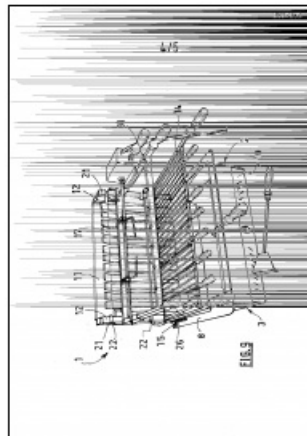

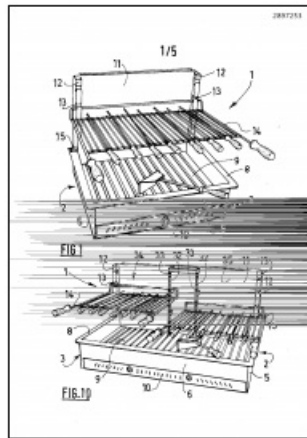

**Abstract:**

Source: FR2897253A The grill (16) has vertical plates spaced with respect to each other and connected by transversal bars for forming a flat surface. Rods (24) are disposed at the rear of the plates, and a ratchet (26) is mounted on posts (21) and moves around an axle parallel to a plane formed by the plates. The posts comprise openings (22) forming a rack constituting a unit for receiving cooking accessory e.g. spit. L'element, typiquement une grille 16, est destine a etre monte verticalement sur le corps d'un barbecue. Il comprend des moyens de fixation amovible (retour 19a, tige 24, ...

FIREBOX FOR WATER FOR CAMPING

### Abstract:

Source: US2007193576A A portable heating device includes an enclosed structure for containing and heating water. The firebox is constructed of steel and sits on four removable legs, allowing a campfire to burn on top of and underneath the firebox, maximizing heating elements. The heating of large quantities of water can be achieved by circulating water from a reservoir, through heat resistant hoses to the firebox, and then back into the reservoir once heated. This feature allows a hot tub for camping. A receptacle is placed in the upper firebox allowing a support post to be inserted, which ...

GRILLER WITH DETACHABLE  
STOVE

**Abstract:**  
Source: US2008271728A The present invention provides a griller with detachable stove. The griller includes a pedestal portion and a stove portion. The stove has a connecting portion at a bottom of the main body of the stove, that can be assembled onto the stove coupling portion of the pedestal portion. Thus, the stove is integrated with the pedestal, or the stove can be removed from the pedestal for independent use. In such a case, the stove can be placed on the ground or a desk via the stand at the bottom of the main body. The large-sized griller of the present invention can be converted ...
