(54) Title: GITRL FUSION PROTEINS AND USES THEREOF

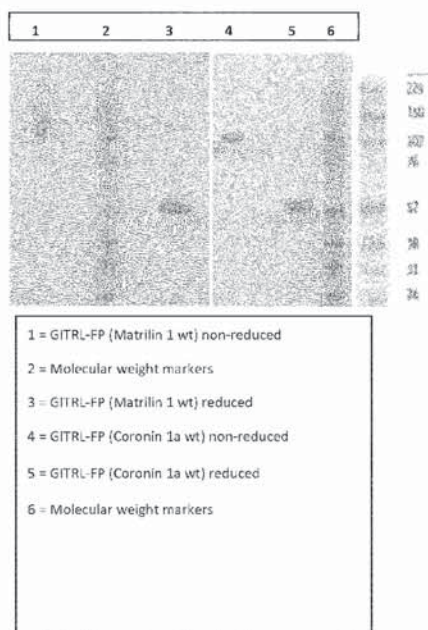

Figure 1

(57) Abstract: The disclosure provides GITRL fusion polypeptide subunits comprising an IgG Fc domain, a trimerization domain, and the receptor binding domain of GTR ligand, where the fusion polypeptide subunits can self-assemble into hexameric proteins. Also provided are methods of making fusion polypeptide subunits and hexameric proteins, and methods of use, e.g., treatment of cancer.
