(54) Title: METHODS AND SYSTEMS FOR DYNAMIC CONTROL OF FLOW OF ALERT MESSAGES IN MOBILE NETWORKS

(57) Abstract: A method and a system for sending alert messages are provided. The method includes accessing location information of a plurality of user mobile devices in a mobile network from a database. The method further includes accessing a message handling capacity information of each of a plurality of network elements in the mobile network. Furthermore, the method includes sending, through the plurality of network elements, an alert message to the plurality of user mobile devices based on the location information. Moreover, sending the alert message through a network element of the plurality of network elements includes at least controlling a sending rate of the alert message through to the network element based on a message handling capacity information of the network element and a real-time delivery status information of the alert message that are already sent through the network element.
