Gaming and amusement machines.
Spiel- und Unterhaltungsgeraete.
Machines de jeux et d'amusement.

Abstract:

Source: EP0316175A2 The carcase of a fruit machine is formed in two separable parts (A and B). The main part (A) contains all the coin-handling apparatus including coin entry slots (5), a coin accepting and validating mechanism (6), stack tubes (7) and a cash box (11), and the other part (B) contains all the game-playing apparatus including rotatable reels (13) or their equivalent and display panels (14 and 15). The side walls (2) of the main part (A) extend upwards into the other part (B) and all the components of the coin-handling apparatus apart from the coin box (11) are positioned in ...

Gaming machine information, communication and display system

Abstract:

Source: US5429361A An information and communication system permits communication between gaming machines and a central control system and between a player or operator and a central control system. The system includes a central data processor, a control unit for each gaming machine within the system which is in communication with the central data processor and a user interface which includes a keypad, a card reader and a display. A user interface is secured to each gaming machine and operatively connected to the control unit. The keypad can be used by a player or operator to transmit ...

Gaming machine currency apparatus and method therefore

Abstract:

Source: US6068101A A gaming machine and method including a housing having a door which exposes a currency mechanism along a medial portion thereof and located between a side wall and a monitor. This strategic location of the currency mechanism allows clearance for an underlying coin hopper so as to minimize the need for an external currency mechanism and to provide access to the coin hopper in a much more maintenance friendly manner for tending to the coin hopper and currency mechanisms, e.g. for filling, etc.

Title:

Slot cabinet and base unit therefor

Abstract:

Source: US5826882A A slot cabinet and base unit of this invention are provided for maximizing the number of gaming machines within a given floor space. The invention minimizes required floor space by reducing the size of the gaming machine and also enabling a player to sit closer to the gaming machine. The slot cabinet has a narrowed profile which reduced its effective width. The slot cabinet further includes a rear member which complements another slot cabinet placed back-to-back, thus reducing the overall width of two slot cabinets placed back-to-back. The arrangement of the elements of ...

Title:
DOORFRAME FOR GAMING MACHINE

Abstract:

Source: US2007207861A A doorframe is provided that uses angled display areas in a single frame to allow more than one display means to be mounted or placed behind the door with the viewing area facing outward. This allows a player to more comfortably view a multiple-display gaming machine from a single location while at the same time, allows attendants or engineers working on a gaming machine to more readily access the internal workings of the gaming machine by having to only open a single door.

METHODS AND APPARATUS FOR
PROVIDING AN ADAPTIVE GAMING
MACHINE DISPLAY

Abstract:
Source: US2012322542A Disclosed
herein are techniques for providing
an adaptive gaming machine. In
some implementations, a spatial
coordinate of an eye area of a
player in proximity to the electronic
gaming machine may be
determined. The spatial coordinate
may define a location of the eye
area in relation to the electronic
gaming machine. Based on the
identified eye location, a preferred
viewing area of a display screen
associated with the electronic
gaming machine may be
determined. A determination may be
made as to whether a game play
portion of the video data is
positioned within the ...
