- **Hand vegetable transplanter**
with assembly for varying
quantity of liquid dispensed.
- AB

- **Apparatus** (10) for transplanting
of vegetables or other plants is
provided which eliminates stoop
labor while properly placing
plants (142) within earth
openings (84); at the same time,
a measured quantity of liquid
(42) is delivered to the opening
(84). The **apparatus** (10) includes
a pair of elongated, juxtaposed,
frustoconical chamber (12, 14)
each equipped with selectively
actuatable stopper means (16,
18) adjacent the lower ends
thereof. Actuation of a pivotal
operating handle (90)
simultaneously **opens** the
stopper means (16, 18) for
delivery of a plant (142) and
liquid (42) to a plant site. An
adjusting assembly (106) is
provided for varying the amount
of liquid (42) delivered during
each transplanting operation.
