Title: EDIBLE DRINKING STRAW FORTIFIED WITH NUTRITIONAL SUPPLEMENTS

Abstract: An edible, nutrient-rich drinking straw for use in consuming beverages. Preferably, the drinking straw is formed from one or more compressed fruit powders, natural flavor, natural color and humectant that is extruded to assume the drinking straw shape. Thereafter a sealing coating, such as wax, is applied to the straw. The straw of the present invention may be formulated to have a desired rate at which it dissolves into a beverage, and may further be formed to have any of a variety of alternative configurations, such as other types of utensils for consuming food and beverages.

Title: EDIBLE SWEETENING TEASPOON

Abstract: The invention relates to a teaspoon for sweetening a liquid forming a tea. The invention consists of: an oval- or similarly-shaped functional part which is made from a consistent, solid-state sweetening material which is soluble in a liquid; and a handle comprising a long piece of solid material which is not necessarily soluble, but which is edible. The two parts are joined by means of a sharp extension that projects out from one of the parts and an angular socket in the other part. The inventive edible utensil is preferably intended for tea drinkers and similar.

Title: EDIBLE STRAW AND METHOD FOR MAKING THE STRAW

Abstract: A nutritious edible straw for imbibing liquids is made from a mixture of dry ingredients and wet ingredients that have been baked. The dry ingredients include flour, a sugar source, a fiber source, a leavening agent, and a flavoring agent. The wet ingredients include egg whites, sugar, and a flavoring agent. According to a method of making the edible straw, the dough can be made as a cylinder, pierced with a rod that remains intact, and released on completion of the baking process. Alternatively, the dough can be made by extruding the dough in a cylinder shape with a cavity formed as a result of the extrusion mold and, then, baked with or without a rod. In the case of utilizing the rod, the rod is released on completion of the baking process.
