REF: NC2019/0005833 - Patente PCT - Fase Nacional en Colombia PCT/US2017/065240

Yo, **ELIANA ISAURA MORENO BOHÓRQUEZ**, abogada, mayor de edad, identificada con cédula de ciudadanía número 51.975.664 de Bogotá y tarjeta profesional número 83.823 del Consejo Superior de la Judicatura, en calidad de **AGENTE OFICIOSO** del solicitante, de manera respetuosa, me permito solicitar que se sirvan corregir en el sistema SIPI que el solicitante es únicamente **VERIDIUM IP LIMITED**, para fases nacionales exceptuando EE.UU, como consta en la publicación internacional **WO/2018/106987**. Para tal efecto, me permito presentar la primera página de solicitud de patente de invención **PCT/US2017/065240** con publicación **WO/2018/106987**, como constancia.

Lo anterior debido a que al momento de radicación, como es sabido el sistema SIPI trae todos los datos consignados en la solicitud **PCT/US2017/065240** a partir de **patentscope.wipo.int** sin tener en cuenta que la solicitud contiene una anotación que señala que el señor **Asem, OTHMAN** solo es solicitante para EE.UU (*for US only*).

De igual forma, una vez reciba el poder de mi representado **VERIDIUM IP LIMITED**, lo estaré presentando a la mayor brevedad ante su Despacho.

Agradezco proceder de conformidad.

Quedo atenta a cualquier aclaración al respecto.

Atentamente,

ELIANA ISAURA MORENO BOHÓRQUEZ

IMAGERY CAPTURED USING MOBILE DEVICES

FIG. 4C

(57) Abstract: Technologies are presented herein in support of a system and method for performing fingerprint recognition. Embodiments of the present invention concern a system and method for capturing a user's biometric features and generating an identifier characterizing the user's biometric features using a mobile device such as a smartphone. The biometric identifier is generated using imagery captured of a plurality of fingers of a user for the purposes of authenticating/identifying the user according to the captured biometrics and determining the user's liveness. The present disclosure also describes additional techniques for preventing erroneous authentication caused by spoofing. In some examples, the anti-spoofing techniques may include capturing one or more images of a user's fingers and analyzing the captured images for indications of liveness.
