

LISTA DE LAS REFERENCIAS CITADAS POR EL EXAMINADOR EN  
ESTADOS UNIDOS  
(Procedimiento Acelerado de Examen de Patentes - PPH)

| NÚMERO DE DOCUMENTO DE PATENTE | TÍTULO                                                                                                             | SOLICITANTE                     | FECHA DE PUBLICACIÓN | CITADOS POR EL EXAMINADOR COMO |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------|---------------------------------|----------------------|--------------------------------|
| US20180035470-A1               | Method and apparatus for improving msg3 transmission of random access procedure in a wireless communication system | ASUSTek Computer Inc.           | 2018-02-18           | Chen; Wei-Yu                   |
| US20180359785-A1               | Method and apparatus for improving msg3 transmission of random access procedure in a wireless communication system | ASUSTek Computer Inc.           | 2018-12-13           | Chen; Wei-Yu                   |
| US20180034515-A1               | Method and apparatus for handling ue beamforming in a wireless communication system                                | ASUSTeK COMPUTER INC.           | 2018-02-01           | Guo; Yu - Hsuan                |
| US20170331670-A1               | Network Architecture, Methods, and Devices for a Wireless Communications Network                                   | Telefonaktiebolaget LM Ericsson | 2018-11-16           | Parkvall; Stefan               |
| US20170331577-A1               | Network Architecture, Methods, and Devices for a Wireless Communications Network                                   | Telefonaktiebolaget LM Ericsson | 2018-11-16           | Parkvall; Stefan               |
| US20160381699-A1               | Methods and systems of an all purpose broadband network                                                            | All Purpose Networks LLC        | 2016-12-29           | Rubin; Harvey                  |
| US20150079945-A1               | Network migration queuing service in a wireless network                                                            | All Purpose Networks LLC        | 2015-03-19           | Rubin; Harvey                  |
| US20120122459-A1               | Method, apparatus, and system for voice call fallback to circuit switched domain                                   | Huawei Technologies Co., Ltd.   | 2012-05-17           | Wu; Xiaobo                     |
| US20150071250-A1               | Data forwarding method, device, and communications system                                                          | Huawei Technologies Co., Ltd.   | 2015-03-12           | DAI; Mingzeng                  |
| US20170257780-A1               | Channel accessing method and device in wireless communication system                                               | Samsung Electronics Co . , Ltd  | 2017-09-07           | Ryoo; Sunheui                  |
| US20140228032-A1               | Method for supporting mobility of user equipment in wireless communication system,                                 | LG ELECTRONICS INC.             | 2014-08-14           | Jung; Sung Hoon                |

|                  |                                                                                                       |                     |            |                 |
|------------------|-------------------------------------------------------------------------------------------------------|---------------------|------------|-----------------|
|                  | and device supporting the same                                                                        |                     |            |                 |
| US20110310845-A1 | Method of handling an uplink synchronization timer during a handover in wireless communication system | LG ELECTRONICS INC. | 2011-12-22 | Jung; Sung Hoon |
