(54) Title: SOLAR CONTROL GLASS ARTICLE

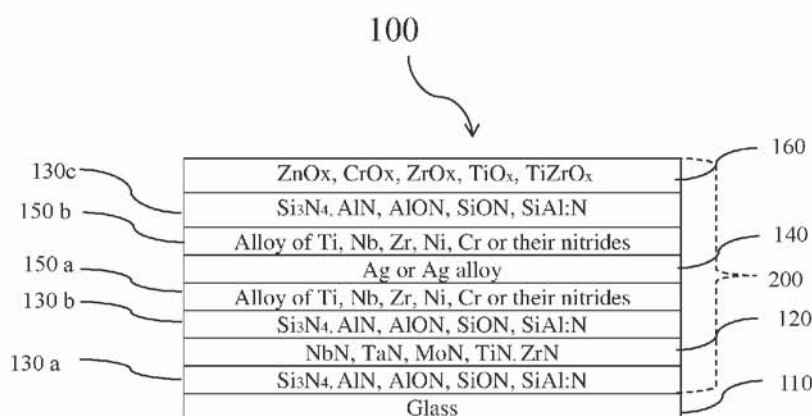

FIG. 2

(57) Abstract: A solar control glass article comprising a transparent substrate provided with a thin multilayer coating 200 having solar control properties as shown in FIG. 2 is disclosed. The thin multilayer coating comprises of an absorber layer sandwiched between a first and second transparent dielectric layers, a functional layer protected by an upper and lower blocker layers and a third transparent dielectric layer provided over the upper blocker layer. The thickness of the functional layer and the thickness of the transparent dielectric layers are adjusted to give a gold colored reflection on a surface opposite to the first surface of the transparent substrate provided with a thin multilayer coating.
