A **personal care** appliance kit

AB - (A1)
The present application is concerned with a **personal care** appliance kit comprising a display device that has a continuous front panel, a window area being a part of the front panel, which window area is transmissible with respect to a signal radiation, a display area being a part of the front panel, which display area is less transmissible with respect to the signal radiation, and a receiver unit placed on a backside of the window area and adapted for receiving the signal radiation. Thus, a display device is provided that does not require a further signal radiation receiver window and further the device can be made water proof by mounting only the front panel in a water-tight manner.

- TI - SHAVING KIT, ARTICLE OF COMMERCE AND A METHOD OF SHAVING COMPRISING A **PERSONAL CARE** COMPOSITION
- AB - A shaving **kit** comprising a **personal care** article is disclosed. The shaving **kit** comprises a package containing a **personal care** composition comprising a surfactant, water and at least about 15% of a hydrophobic moisturizing material and a plurality of razor blade cartridges or a shaving razor. An article of commerce is also disclosed that comprises a **personal care** article comprising a package containing a visually distinct, multiphase **personal care** composition and a set of in association with the **personal care** article. A method of shaving is also disclosed. The method comprises the steps of: wetting a skin surface; dispensing the multiphase **personal care** composition from the **personal care** article that comprises a package containing a visually distinct, multiphase **personal care** composition; contacting a skin surface with the **personal care** composition, and applying a shaving razor to the skin surface.

- TI - Attractive implement **kit**
for **personal care** usage

AB - An attractive implement **kit** for **personal care** usage is provided. The **kit** includes a set of separate **personal care** implements and a case for securing and protecting the implements. The case includes a compartment having an opening communicating with the inside and a hinged cover for selectively closing the opening. One or more sleeves are mounted in the compartment in pivoting relation so that the sleeves may pivot outward from the compartment. Each of the sleeves includes an aperture into which one of the implements is received. The sleeves may pivot into the compartment and the cover may be closed to enclose the implements inside the case. A mirror is attached to the cover to facilitate use of the implements. The implements are independent when removed from the sleeves and are of high quality.

Personal care kit with
 dispenser unit in closure
 means
 - (B)
Personal care kit
 AB - (A)
 A **personal care kit**, especially
 a **women's sanitary kit**,
 comprises: a tubular casing
 defining one or more
 chambers 32 for containing
 one or more **personal care**, eg.
 sanitary, items, the chamber
 32 being provided with
 removable closure means 34,
 36; wherein the closure means
 incorporates a dispenser unit
 34, preferably a spray
 dispenser, eg. an aerosol, for
 delivering a **personal care**
 product therefrom. The **kit**
 conveniently enables a variety
 of **personal care** items, plus a
 spray dispenser, to be
 accommodated within a
 compact, readily portable,
 discreet unit which can for
 example be designed to
 resemble in size and shape a
 conventional aerosol can. The
 chamber 32 may contain a

disc 40 which can be lifted by a handle 42, 43 to eject items from the chamber. The casing may include an additional, separate chamber beneath chamber 32 and having its own removable closure means at the base of the casing (Figures 1-3).

 TI - A method of and apparatus for hairdressing
 AB - A method of hairdressing dreadlocks, wherein a length of thread is secured at a first anchor point 18, fed through the dreadlock 16, and then secured at a second anchor point 20, maintaining tension in the thread and causing the dreadlock to be compressed between the two points. The thread may be impregnated with nourishing oils or **fragrance**. A dreadlock may be secured at three or more points along its length. The thread may be passed through the centre of the dreadlock using a long needle. Also claimed is a **kit** comprising a needle and thread. In another aspect of the invention the thread is threaded through the dreadlock first and then attached at first and second points with the thread shorter than the length of dreadlock between those two points, or at positions whereby the dreadlock is in compression. The dreadlock will depending on the tension either be supported and compressed or curled. The curling will last a long time including contact with water.

TI - PERFUME BLENDING KIT AND METHOD OF PERFUME BLENDING

AB - A **kit** for applying a perfume blend on a user is described, The **kit** can include a plurality of dispensers, where each dispenser comprises a different **fragrance** composition; and instructions that include a number of perfume recipes. Each perfume recipe can provide for applying at least two of the **fragrance** compositions on a location of a wearer to produce a perfume blend at the location. The dispensers can be roll-on dispensers, and each of the perfume recipes can include applying at least one stroke of at least two different **fragrance** compositions to the location in a specific order. Methods of blending perfumes are also described.

 TI - INSTANT AND CONTINUOUS **FRAGRANCE** DISPENSING ASSEMBLY, METHOD OF PACKAGING, AND METHOD OF USING SAME.
 AB - A packaged **kit** for storing an instant **fragrance** dispensing assembly includes a storage container having a sealed interior chamber containing porous reeds in a fragranced liquid. The porous reeds and the fragranced liquid are put in the storage container, placed in contact with each other, and the storage container is sealed. The packaged **kit** provides instant and continuous **fragrance** to a room by opening the sealed storage container and transferring the porous reeds and the fragranced liquid from the storage container to a holding container. A portion of the porous reeds extend from the holding container and release the **fragrance** from the exposed fragrant liquid into the surrounding area.

TI	- Aromatic accessory and method thereof
AB	- An aromatic bag freshener specifically for the interior of various types of carrying bags, including handbags and athletic bags, provides a highly perforated, hollow, decorative holder that allows the insertion and placement of pre-scented material within the holder. Fragrance may escape from the pre-scented material to the ambient environment within the bag through the perforated area of the holder. The holder may take the shape of a teardrop, flower petal, geometric shape, or the like, and extends from a decorative chain, strap or other attachment element with an end hook, pin, or magnetic clasp to fasten the holder to the inside of the bag. The scent carrying material may comprise pre-scented wax-based material, scented molded polymer, formed absorbent carrier material infused with fragrance , or other scented material. The holder, and scented insert are organized into a kit which has a matching color coded position, emotive word, and/or associated name for each fragrance .
