(54) Title: HERBICIDAL COMPOSITIONS AND USES THEREOF

(57) Abstract: A herbicidal composition is provided, the composition comprising components: (A) diflufenican; and (B) glyphosate. A method for controlling unwanted plant growth at a locus comprises applying to the locus component (A) diflufenican and component (B) glyphosate. There is also provided the use of component (A) diflufenican to reduce the phytotoxicity of component (B) glyphosate. There is further provided the use of component (B) glyphosate to reduce the phytotoxicity of component (A) diflufenican. The composition and method are particularly useful in the control of unwanted plant growth in crop plants while causing reduced damage to the crop plants.
