(54) Title: BAG FOR SOLID CONCENTRATE

(57) Abstract: The invention relates to a bag (1) made of a flexible wall, which bag is fitted with an inlet fluid line for introducing dissolution water, and with an outlet fluid line (121, 122) for extracting a solution obtained. According to the invention, the inside of the bag has a lower edge (13) in the overall shape of a V, the point of the V being further away from the centre of the bag than the arms of the V, the outlet fluid line opening into the bag as close as possible to the point of the V.
