Referencia : Respuesta al Oficio No. 4251, notificado el 29 de marzo de 2021
Título patente : PROCEDIMIENTO DE FABRICACIÓN DE TABLEROS ESTRATIFICADOS MULTICAPAS Y TABLERO OBTENIDO MEDIANTE DICHO PROCEDIMIENTO
Expediente : NC2018/0008202
Solicitante : FINANCIERA MADERERA S.A.

ADRIANA PAOLA PEÑARANDA URBINA, identificada como aparece al pie de mi firma, obrando en mi condición de apoderada de **FINANCIERA MADERERA S.A.**, me permito dar respuesta al Oficio No. 4251, notificado el 29 de marzo de 2021. Por ello, ruego a su Despacho tener en cuenta lo siguiente:

1. Reivindicaciones:

- Observamos que el Examinador sigue considerando que definir el tablero con base en la diferencia absoluta de humedades entre capas es definirlo por los resultados a alcanzar y no por las características técnicas propias que permiten conseguir dicho resultado. En este sentido, respetuosamente deseamos aclarar que en la tabla que sigue al punto 5.2 del Oficio 4251, notificado el 29 de marzo de 2021, el mismo Examinador está considerando intervalos de humedad en % en peso en D1, de tal manera que esto nos da pie a considerar y a concluir que dicha característica es una característica técnica como tal y no un resultado a obtener. Con base en ello, resulta claro que las expresiones citadas por el Examinador con respecto a la Reivindicación 1 corresponden a características técnicas esenciales y no a resultados técnicos a alcanzar.
- Con respecto a las expresiones “comprendiendo” y “caracterizado por” en la Reivindicación 12, el Examinador considera que estas mismas no permiten especificar el alcance de la invención, sugiriendo que tendríamos que aclarar las características esenciales precedido por únicamente “caracterizado por”. Frente a esta objeción y tal como lo conversamos en la reunión sostenida con el Examinador el 16 de junio de 2021, comedidamente les manifestamos que la expresión “comprende” es admitida por cualquier oficina, de tal forma que no entendemos por qué quitarla hace que la reivindicación sea clara y dejarla no.

En este punto, aclaramos que eliminar el término “comprende” supone limitarnos innecesariamente a un tablero exclusivamente con las características de la reivindicación, sin que pueda incorporar nada más. Por

esta razón, mantendremos ambos términos, “comprendiendo” y “caracterizado por” en la reivindicación 12.

- Con respecto al término “en un rango entre 1 y 12 puntos”, manifestamos que no estamos de acuerdo con lo expuesto por el Examinador. Reiteramos que este mismo está claramente establecido y, como previamente lo hemos manifestado, esta diferencia está definida entre capas adyacentes. Evidentemente, con base en lo anterior, se debe considerar que prevalece la premisa de que los porcentajes de humedad de las capas internas son siempre menores que los de las capas externas y que esta humedad varía en cada capa, entre el 3% y el 18%.

2. Examen de Patentabilidad: Novedad y Nivel Inventivo

Respetuosamente manifestamos que el Examinador continúa pasando por alto determinadas características geométricas de las reivindicaciones dirigidas al tablero. Pareciera que no se ha terminado de comprender la invención, a la vista de los puntos 5.1. y 5.2. del Oficio 4251, en donde se definen los aspectos geométricos y densidades del tablero y el Examinador los obvia y menciona la composición del grosor de las capas y las virutas de D1.

Comedidamente manifestamos que el examinador no está identificando las características de nuestras reivindicaciones en los documentos del estado de la técnica.

Según el examinador, la única diferencia entre el método de nuestra reivindicación 1 y del de D1 es pre-compactar y opcionalmente precalentar la manta que comprende fibras y/o partículas mezclada con sustancias aglomerantes y/u otros aditivos químicos depositada sobre la cinta transportadora, con el objeto de reducir el tiempo de prensado. No entendemos cómo se puede seguir formulando así el problema técnico a resolver cuando en nuestra respuesta al Oficio No. 8480, notificado el 21 de julio de 2020, ya se explicaba detalladamente la invención y el problema técnico a resolver: conseguir un producto que se compone de múltiples capas y que no se generen tensiones internas que provoquen el alabeo indeseable del tablero y mantengan su planitud. Cabe precisar, entonces, que la presente invención no pretende resolver el problema técnico tal como lo plantea el Examinador.

Rogamos al Examinador analizar los presentes argumentos, en conjunto con aquellos expuestos en nuestra respuesta al Oficio No. 8480, con respecto a la Novedad y Nivel Inventivo de la presente invención. Por favor tener en cuenta que las reivindicaciones fueron modificadas el 30 de noviembre de 2020, de tal manera que es sobre estas últimas que debe ser realizado el examen de fondo.

3. Patente ya concedida en los Estados Unidos de América:

Respetuosamente manifestamos a su Despacho que la presente patente de invención ya fue concedida en los Estados Unidos de América, tal como consta en los documentos anexos. Así pues, si bien entendemos que la Administración toma sus decisiones de forma particular e independiente, rogamos tener en cuenta este hecho,

el cual nos lleva a concluir que la invención objeto de estudio cumple los requisitos de patentabilidad y que, por ende, también debería ser concedida en Colombia.

4. Anexos:

Respetuosamente allego a su Despacho la constancia de la concesión de esta patente en los Estados Unidos de América, tramitada bajo el Expediente 16/078,701.

5. Notificaciones:

Recibiré notificaciones en la Carrera 10A No. 121-48, Apto. 102, Edificio Pacandé, Bogotá, D.C., Colombia o en el correo electrónico info@herrero.com.co

Atentamente,

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.
2. Claims 1-11 and 17-22 are allowable. Claims 12-13 and 15, previously withdrawn from consideration as a result of a restriction requirement, include all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions I-III, as set forth in the Office action mailed on May 26, 2020, is hereby withdrawn** and claims 12-13 and 15 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: Applicant claims a method for producing laminated boards as recited in claim 1.

The closest prior art, Weinkotz et al., U.S. Pre Grant Publication 2013/0183517, teaches lignocellulosic materials having a core and two outer layers wherein the core [geometric center] includes lignocellulosic particles [wood particles]; lignocellulosic fibers [wood fibers]; and one or more binders can include phenoplasts, aminoplasts or organic isocyanates. Paragraphs 0108-0109 disclose that the wood fiber shavings or wood fibers having a moisture content. Weinkotz fails to teach or suggest the method as recited in claim 1 to obtain a board that has a moisture content of 18% and the internal layers or layers that form the board that have a minimum moisture content of 3%.

In summary, 1-13, 15 and 17-22 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
