(54) Title: METHODS FOR DEVICES THAT DO NOT SUPPORT NTNS TO AVOID CELL SELECTION/(RE)SELECTION TO A CELL IN NTN

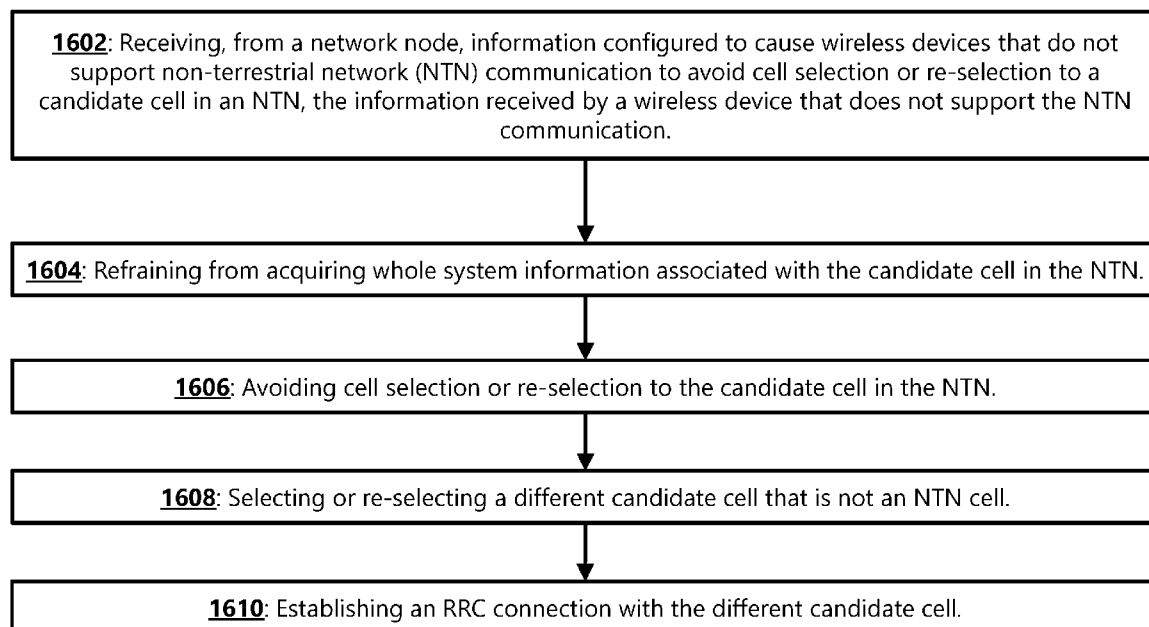

Figure 16

(57) Abstract: According to certain embodiments, a method is performed by a wireless device that does not support non-terrestrial network (NTN) communication. The method comprises receiving, from a network node, information configured to cause wireless devices that do not support NTN communication to avoid cell selection or re-selection to a candidate cell in the NTN. In response to receiving the information, the method comprises avoiding cell selection or re-selection to the candidate cell in the NTN.
