

- 100 Détermining region of interest
- 110 Calculating Haar features
- 120 Applying classifier
- 200 Extracting lines
- 210 Detecting contours
- 220 Determining lines
- 230 Rotation
- 300 Determining parameters
- 310 identifying long feathers
- 320 identifying short feathers
- 330 Calculating a set of parameters
- 400 Applying classification model
