

This diagram shows an exploded perspective view of a battery pack assembly. The main components are labeled with numbers 1 through 7. Component 1 is the top cover, which features a central rectangular opening and several smaller openings. Component 2 is a rectangular plate with two circular holes, positioned to fit into the central opening of the top cover. Component 3 is the bottom cover, which has a large rectangular opening and several smaller openings. Component 4 is a rectangular plate with a diagonal hatching pattern, positioned to fit into the large opening of the bottom cover. Component 5 is a rectangular plate with a diagonal hatching pattern, positioned to fit into one of the smaller openings of the bottom cover. Component 6 is a rectangular plate with a diagonal hatching pattern, positioned to fit into another of the smaller openings of the bottom cover. Component 7 is a rectangular plate with a diagonal hatching pattern, positioned to fit into one of the smaller openings of the top cover. The diagram illustrates how these components are assembled to form a battery pack.

FIG. 1 is a perspective view of a mobile device 100. The device is shown in a closed position, with a front face 102 and a back face 104. The front face 102 includes a display 14, a camera 2, and a speaker 3. The back face 104 includes a camera 2, a speaker 3, and a display 14. The device is connected to a hinge 30, which is shown in a closed position. A latch 31 is also shown, which is used to secure the device in a closed position.
