(54) Title: MULTICOMPONENT FUNGICIDES

FIGURE 1

(57) Abstract: The present invention relates to multi-component combinations comprising at least two components, (1) polyphenol-based component, and as component (2) at least one fungicide selected from the group of Qil fungicide, strobilurin fungicide, SDHI fungicide, an azole fungicide and morpholine fungicide. The combinations optionally comprise one or more compounds as component (3) selected from the group of Protectant fungicides and copper-based compounds. The present invention thus also relates to methods of using the combinations in forming compositions and as beneficial agricultural material, as well as methods of using polyphenol-based compounds to reduce the amount of fungicides required for fungicidal efficacy, and/or to reduce the amount or necessity of combining Protectant fungicides and/or copper-based compounds when using systemic fungicides.
